

ETHOSIA SMART CENSUS PACK (SCP)

Governance-grade census + lineage infrastructure

What it is: Self-hosted · Structured people registry · Lineage and ancestry mapping · Verifiable record discipline

Ethosia SCP is a system of record for people, lineage, and ancestral relationships. It is built for environments where records may be challenged, audited, or handed down across generations.

Core capabilities

Person Registry: unique identifiers with structured attributes and public identifiers. **Lineage Graph:** parent → child edges across generations with cycle-safe enforcement. **Governance posture:** explicit authority, controlled mutation, and export discipline.

Designed for

Families & clans · Traditional councils · Religious bodies · NGOs & civil archives · Local/state/national census initiatives

Licensing principle

Pay once, own your system. No per-record billing. Your database stays with you.

Pricing

| Edition | Nigeria (one-time) | International (approx.) | Best for |
|-----------------------|--------------------|-------------------------|------------|
| Community | ■ 150,000 | ~ \$100 USD | Families |
